(a) ARMSE with boosting nuisances
ARMSE
correct
regression miss.
propensity miss.
both miss.
FOCaL
Pointwise DR
Basis-wise DR
Outcome regression
(b) Fitting time: 10 vs 100 boosters per arm and fold
seconds per replication (log scale)
correct
regression miss
propensity miss.
both miss.
FOCaL
Pointwise DR
Basis-wise DR
(c) Radius of the $\mathbb{L}_2$ sets at $X_1 = q_{0.50}$
$\mathbb{L}_2$ radius
correct
regression miss
propensity miss.
both miss.
FOCaL
Pointwise DR
(d) $\mathbb{L}_2$-set coverage (mean over the four targets)
$\mathbb{L}_2$-set coverage
correct
regression miss
propensity miss.
both miss.
FOCaL
Pointwise DR
